

ISABELLA BIDER

Los Altos, CA | 650-250-6525 | isabella.bider@gmail.com | linkedin.com/in/ibider/

EDUCATION & SKILLS

Northwestern University

Evanston, IL

B.S. Biomedical Engineering, Human-Computer Interaction Certificate

Expected Grad March 2027 | Available July 2027

Technical: Python, SQL, Machine Learning, R, MATLAB, C++, GCP, BigQuery, Power BI, Git/GitHub, OpenAI API, LLMs, RAG, Java

Product: User Research & Discovery, Product Strategy & Roadmaps, Product Analytics & Experimentation, PRDs/Product Specs, Market & Competitive Research, Go-to-Market, UAT, Jira/Agile

EXPERIENCE

AZcare.ai

San Francisco, CA

AI Product Strategy & Market Research Intern

Jul 2026–Present

- Lead 0→1 user and market validation for an AI-powered communication product for Deaf and hard-of-hearing users, conducting 30+ customer discovery interviews to identify user needs, interaction pain points, existing workflows, and trust requirements
- Synthesize customer and stakeholder interviews, competitive research, and market analysis into prioritized use cases, workflow requirements, and recommendations for product and go-to-market strategy

Northwestern University — Neurodevelopmental Disabilities Laboratory

Chicago, IL

AI & Computational Language Research Assistant

Sep 2024–Jan 2025; Aug 2026–Present

- Develop LLM-based conversational experiences to collect naturalistic language data, collaborating across computer science, psychology, and communication sciences
- Apply transformer-based speech and language models to characterize autistic communication and identify computational markers of language and behavior

Accenture

Chicago, IL

Applied Intelligence Technology Summer Analyst (AI Product Management)

Jun 2026–Aug 2026

- Owned cross-functional delivery for Phase 1 and 2 of an enterprise AI operations platform supporting 10,000+ users, translating business needs into roadmap priorities, requirements, and release decisions across engineering and stakeholders
- Led 15 customer workshops, design sessions, and executive demos, translating stakeholder feedback and product usage insights into prioritized user stories and 40+ product enhancements
- Defined and shipped AI product enhancements by authoring PRDs, product specs, user stories, and acceptance criteria, partnering with engineering through sprint planning, testing, and release
- Used SQL and Power BI to analyze 1M+ records, root-cause production and data-quality issues, trace failures to downstream business impact, and partner with engineering to implement fixes

Northwestern University—Center for Robotics and Biosystems: MacIver Lab

Chicago, IL

Research Assistant

Jan 2025–Jun 2026

- Led a neuroscience research project on decision-making under uncertainty, earning 2nd Place at Northwestern's Research Expo after presenting findings to 100+ researchers

Canine Companions for Independence

San Francisco, CA

Data Analyst Intern

Jun 2025–Aug 2025

- Analyzed 43,000+ behavioral records using SQL/R and partnered with trainers to redesign a recurring workflow across 1,500+ puppy raisers, improving data quality and program decision-making

KosiSonic

Chicago, IL

Software Engineering Intern

Mar 2024–Sep 2024

- Developed Python and MATLAB signal-processing algorithms for an AI-powered hearing aid and conducted 25 user interviews, translating complex technical requirements and clinician/user feedback into intuitive product iterations

PROJECTS

GuideAI — Founder & Product Lead

Jan 2026–Present

- Independently built and launched an AI decision-support platform end-to-end, owning customer discovery, product strategy, UX, development, launch, analytics, and 60+ data- and user-informed iterations across 75+ pilot users
- Piloted GuideAI with Canine Companions, supporting 300+ dog trainers and reducing trainer summary preparation time by 45%
- Implemented a RAG architecture using OpenAI embeddings and pgvector, increasing trainer agreement with AI recommendations from 68% to 91%
- Built a human-in-the-loop evaluation framework across 8,500+ AI recommendations and instrumented PostHog analytics to measure \$recommendation quality, user trust, adoption, retention, and experiment outcomes
